

Installing MetaMask and Adding the GBA Test Token to Your Wallet

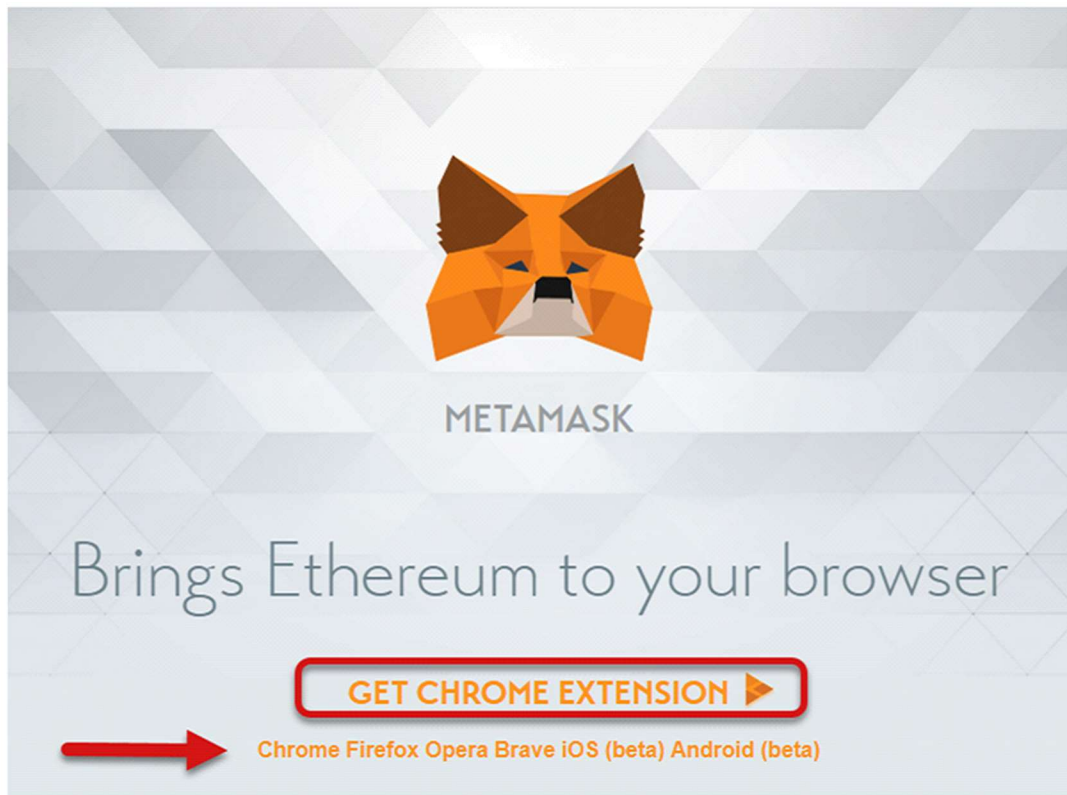

This brief tutorial will walk you through the steps to install the MetaMask web browser add-on and add GBA Tokens (GER) to your wallet. Note: GER is the temporary GBA test token.

Approximate time to complete: 15 minutes

You can install the MetaMask add-on in Chrome, FireFox, Opera, or the Brave web browser.

Step 1

Open the web browser where you want to install MetaMask and go to <https://metamask.io>. Select your web browser on the page, then click **Add** to initiate the installation.

[Home](#) > [Extensions](#) > MetaMask

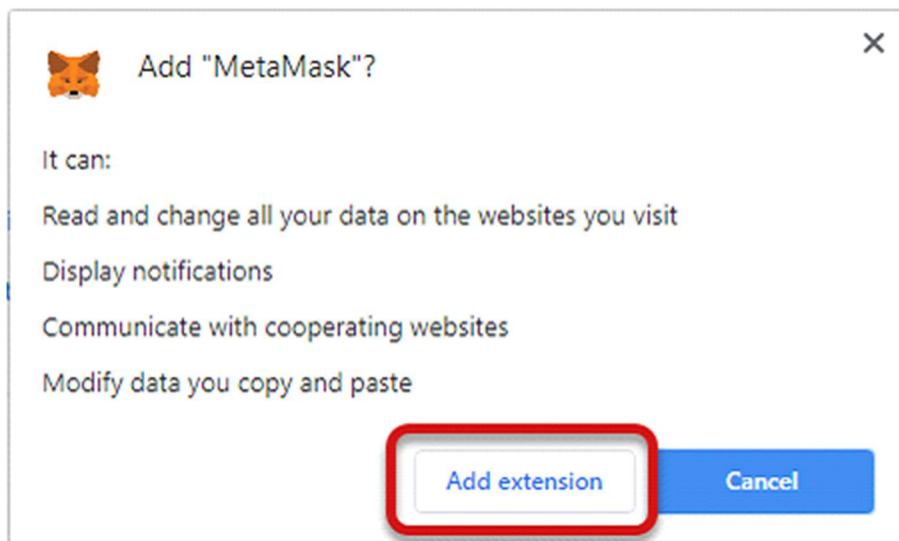

MetaMask

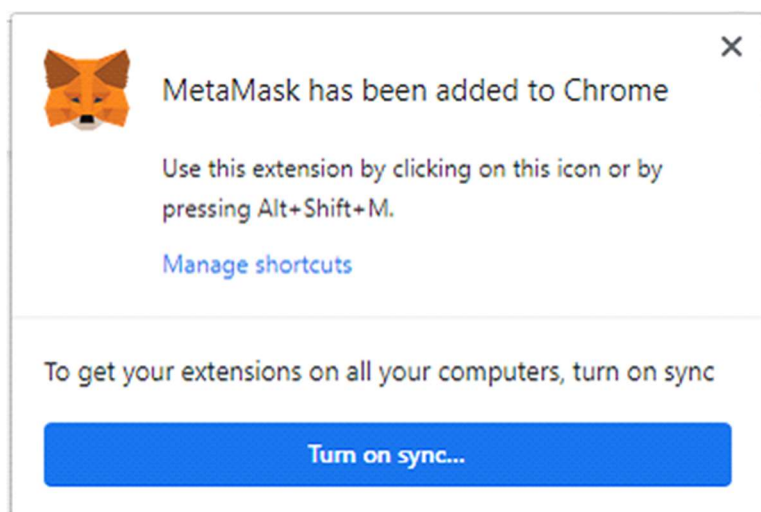

Offered by: <https://metamask.io>

★★★★★ 1,698 | [Productivity](#) | 1,009,518 users

Add to Chrome

Turn on sync is optional. You can close the dialog box to bypass this step.

Step 2

Click **Get Started** to create a new wallet.

Welcome to MetaMask

Connecting you to Ethereum and the Decentralized Web.
We're happy to see you.

Get Started

Step 3

Create a password (min 8 characters), review Terms of Use, and click **Create**.

Create

Step 4

Get your Secret Backup Phrase. This is a 12-word phrase (also called a seed phrase) used for account recovery. * Click the **Secret Backup Phrase lock icon** to view the phrase.

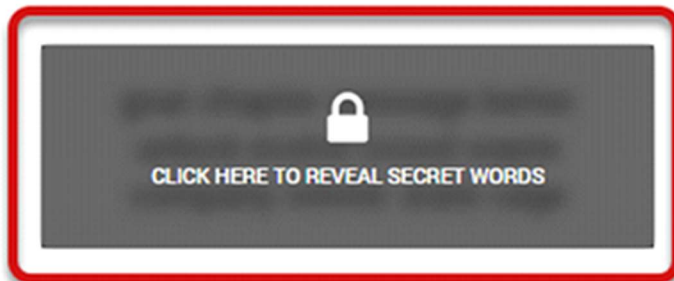

* You should write it down and keep in a secure place.

You'll need to refer to your Secret Backup Phrase in the next step.

Secret Backup Phrase

Your secret backup phrase makes it easy to back up and restore your account.

WARNING: Never disclose your backup phrase. Anyone with this phrase can take your Ether forever.

[Remind me later](#)

[Next](#)

Click **Next**.

Tips:

Store this phrase in a password manager like 1Password.

Write this phrase on a piece of paper and store in a secure location. If you want even more security, write it down on multiple pieces of paper and store each in 2 - 3 different locations.

Memorize this phrase.

[Download this Secret Backup Phrase and keep it stored safely on an external encrypted hard drive or storage medium.](#)

Step 5

On the confirmation page, the words in your Secret Backup Phrase display in a randomized sequence under a confirmation box.

Confirm your Secret Backup Phrase

Please select each phrase in order to make sure it is correct.

blue	rose	street	walk
book	park	tree	sky
clock	cart	ribbon	pen

Confirm

Click each word of your Secret Backup Phrase (in order) to enter it in the confirmation box. You can drag the words to their correct positions in the confirmation box to complete your phrase.

Confirm your Secret Backup Phrase

Please select each phrase in order to make sure it is correct.

park

street

blue

rose

street

walk

book

park

tree

sky

clock

car

ribbon

pen

Confirm

Click **Confirm**.

The MetaMask add-on is installed.

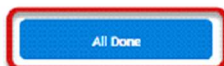

Congratulations

You passed the test - keep your seedphrase safe, it's your responsibility!

Tips on storing it safely

- Save a backup in multiple places.
- Never share the phrase with anyone.
- Be careful of phishing! MetaMask will never spontaneously ask for your seed phrase.
- If you need to back up your seed phrase again, you can find it in Settings -> Security.
- If you ever have questions or see something fishy, email support@metamask.io.

*MetaMask cannot recover your seedphrase. [Learn more.](#)

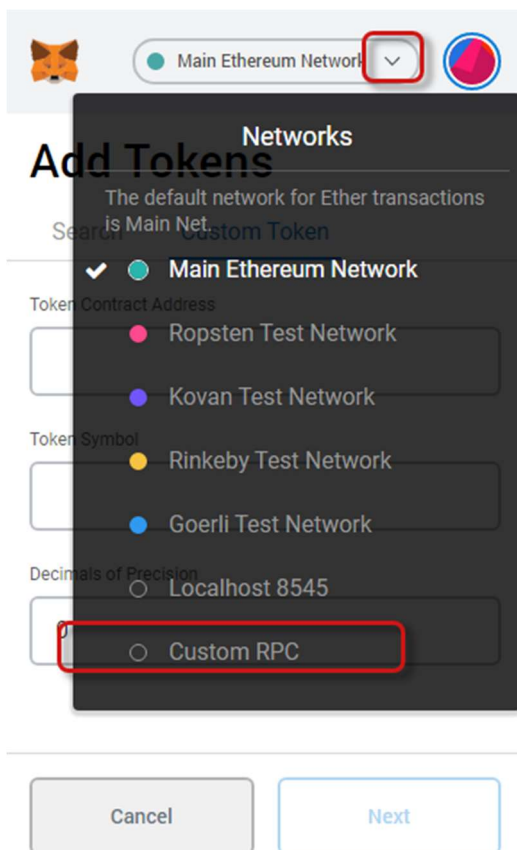

Step 6

Your public wallet address displays at the top of the wallet window. Place your mouse over the address to use the Copy to clipboard option. You'll need your wallet address later to receive tokens.

Step 7

Click on the dropdown arrow next to the Main Ethereum Network.

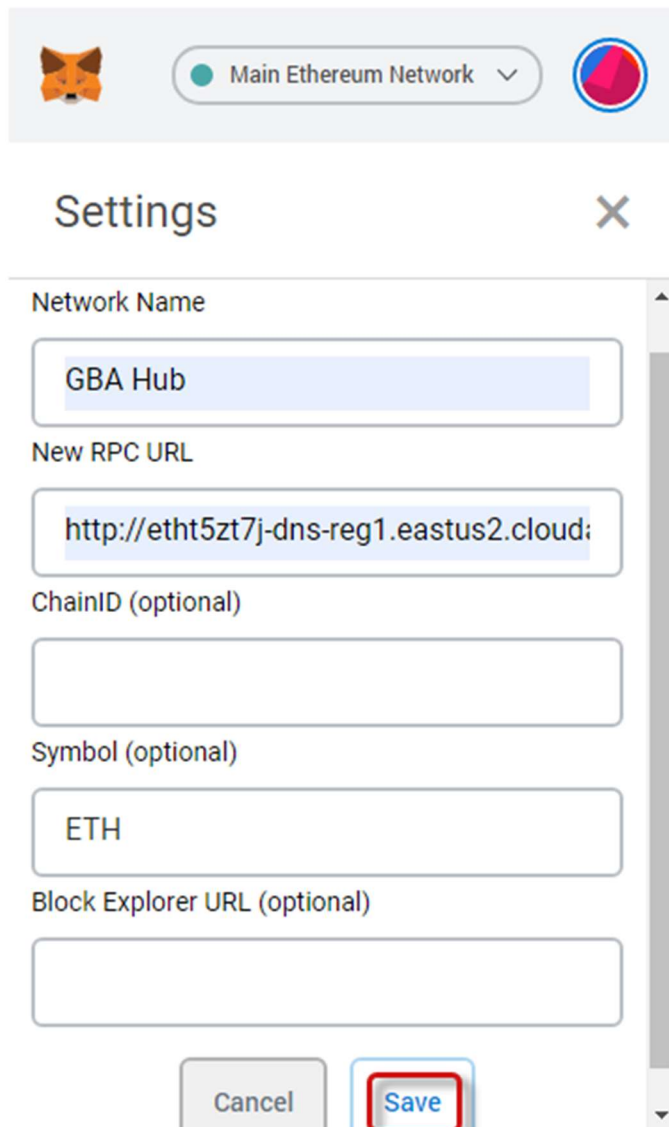

Choose **Custom RPC**.

Step 8

- Enter the Network Name: GBA Hub
- Enter New RPC URL: <http://eth5zt7j-dns-reg1.eastus2.cloudapp.azure.com:8540>
- Enter Symbol: ETH

Click **Save**.

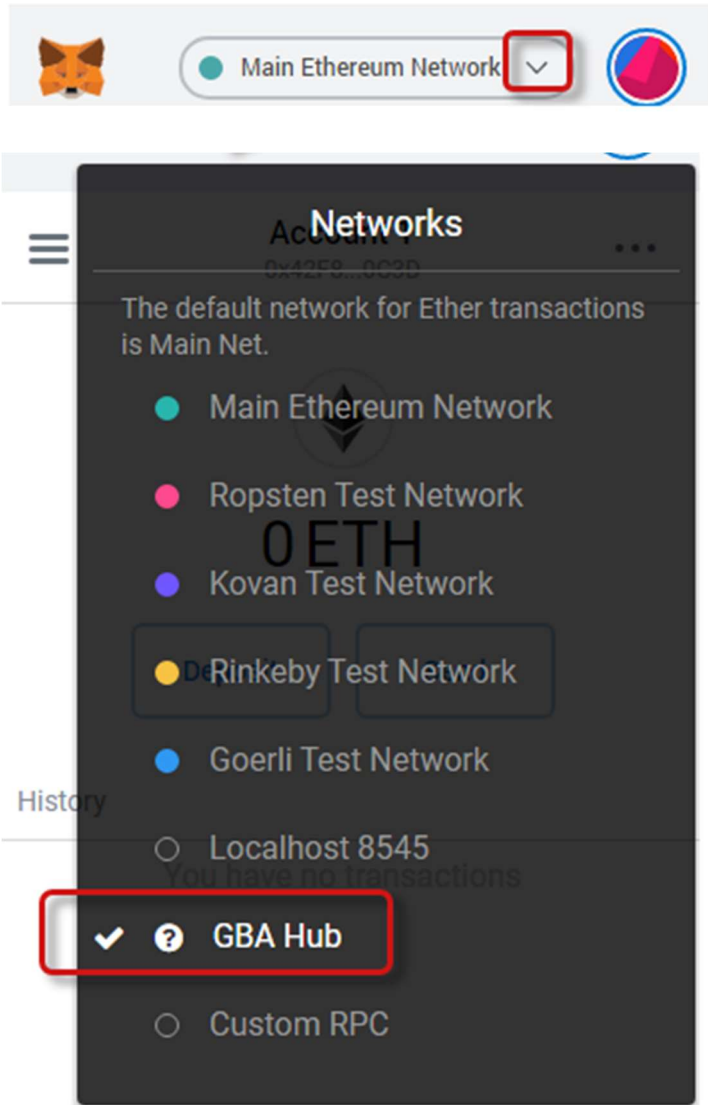

The screenshot shows the MetaMask interface with the 'Settings' dialog open. At the top, there's a header bar with the MetaMask fox logo, a dropdown menu set to 'Main Ethereum Network', and a circular network icon. The 'Settings' dialog has a title bar with 'Settings' and a close button (X). Inside the dialog, there are several input fields: 'Network Name' with 'GBA Hub', 'New RPC URL' with 'http://eth5zt7j-dns-reg1.eastus2.cloudapp.azure.com:8540', 'ChainID (optional)' (empty), 'Symbol (optional)' with 'ETH', and 'Block Explorer URL (optional)' (empty). At the bottom of the dialog are two buttons: 'Cancel' and 'Save'. The 'Save' button is highlighted with a red rectangular border.

MetaMask will connect to the RPC URL you entered.

If the connection doesn't complete within a few minutes, close then reopen your web browser, and repeat steps 7 and 8.

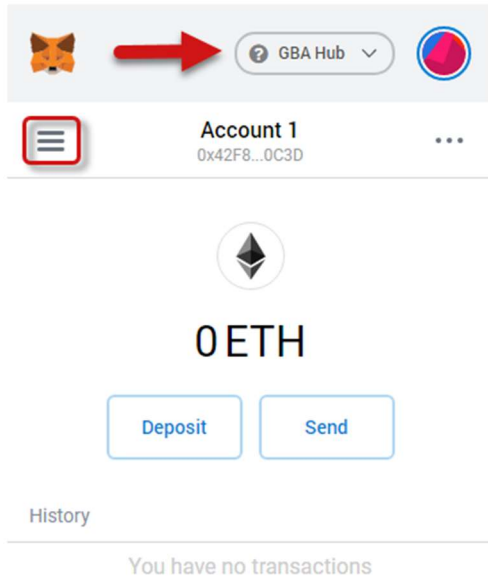

Step 9

Click on the network dropdown icon and select **GBA Hub**.

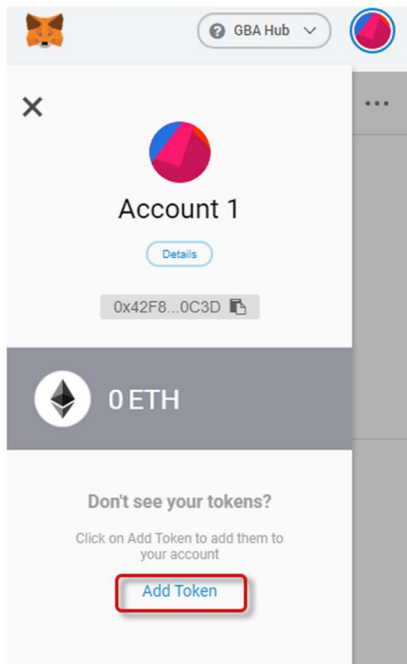

Step 10

With the GBA Hub network selected, select the **menu icon**.

Step 11

Select **Add Token**.

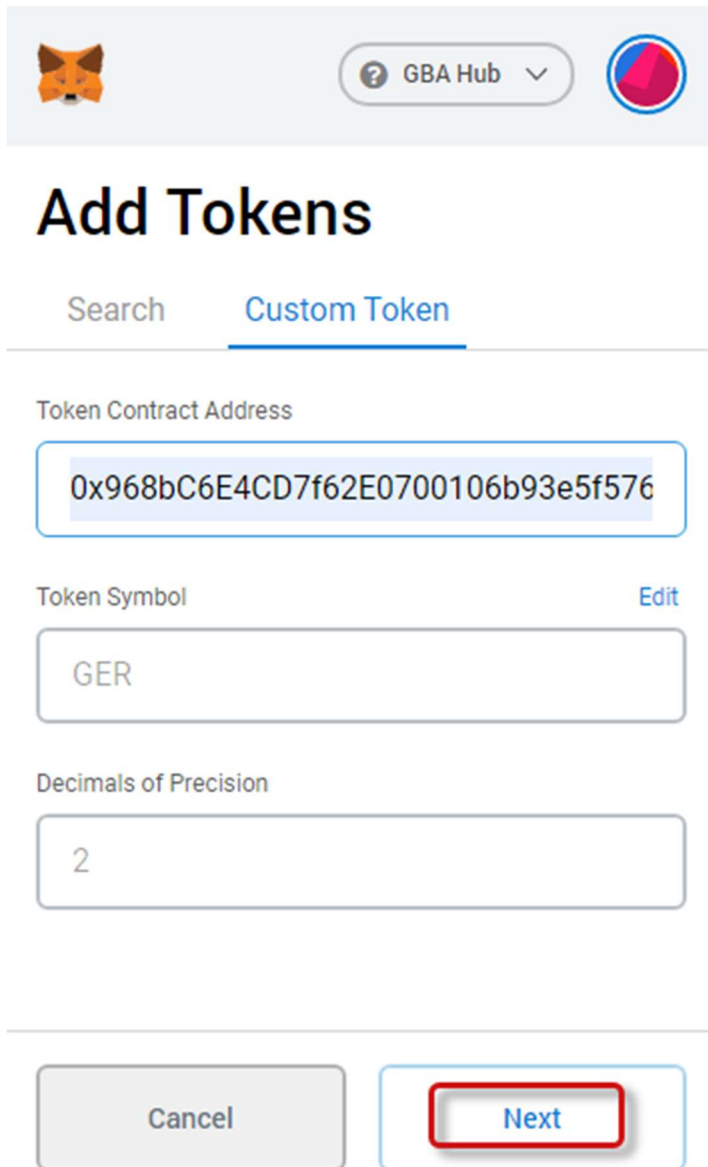

Step 12

Select the **Custom Token** tab.

Enter (copy and paste) the Token Contract Address :
0x968bC6E4CD7f62E0700106b93e5f576cb0d92758

The Token Symbol (GER) and Decimals of Precision (2) fields will auto-populate.

Click **Next**.
