

Sending and Receiving Tokens

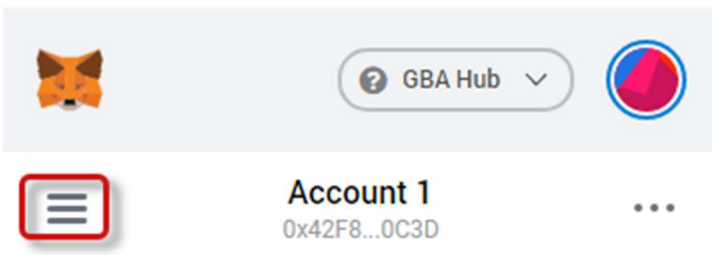

This page provides instructions to GBBP testers. During the initial GBBP test phase, you'll be completing transactions using the temporary **GER** token.

Before you send or receive GBA test tokens, you'll first need to install MetaMask and set up a wallet.

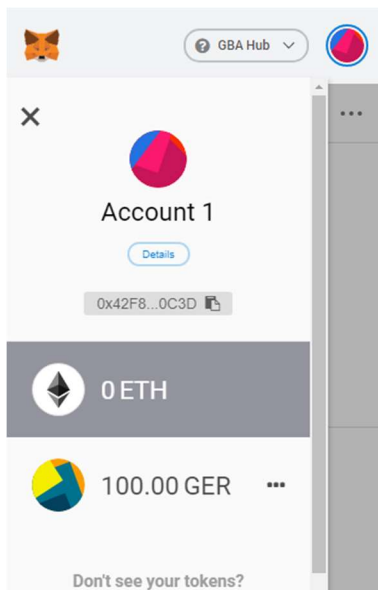

Receiving Test (GER) Tokens

After you've set up your MetaMask wallet, email your wallet address to token holders (contact Mark Waser) to request initial distribution.

Login to your MetaMask wallet and select the **Menu** icon.

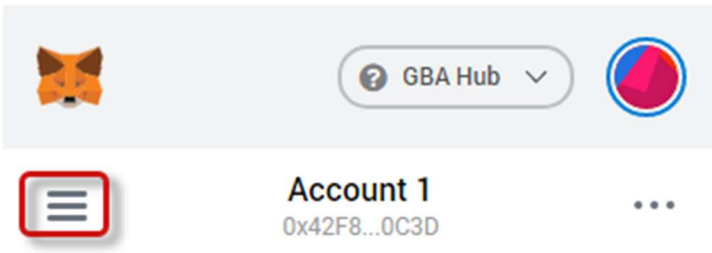

You'll see the GER tokens in your wallet.

Sending Test (GER) Tokens

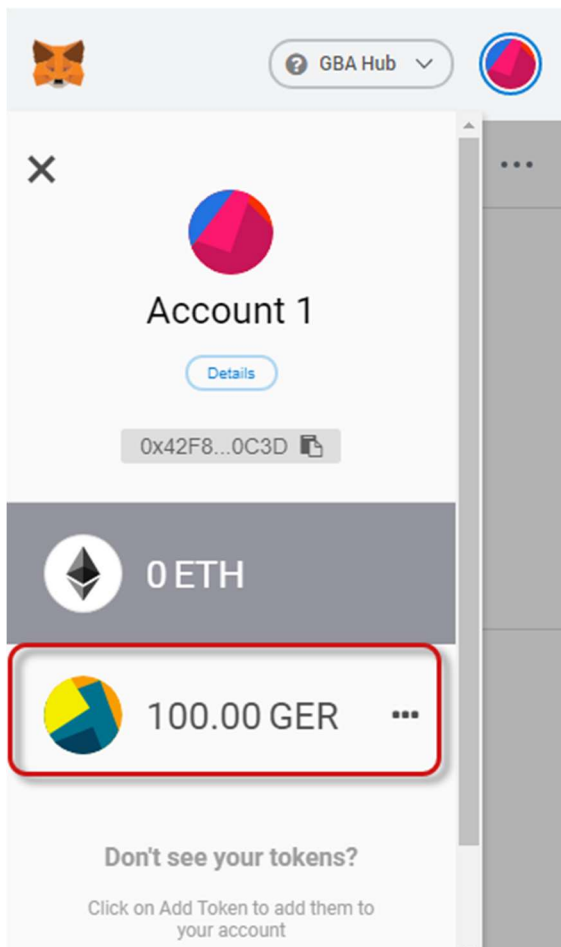

Step 1

To send tokens, login to your MetaMask wallet and select the **Menu** icon.

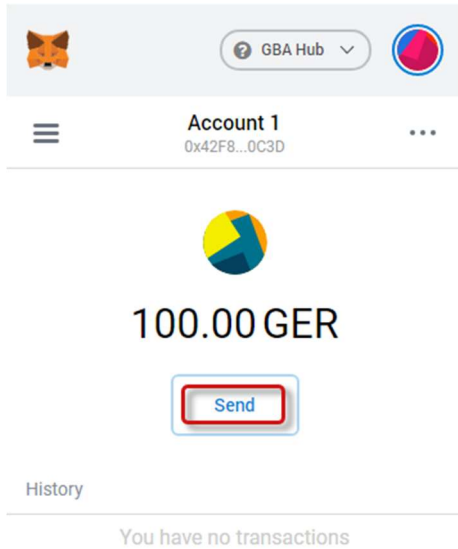

Step 2

Select the **GER** Token.

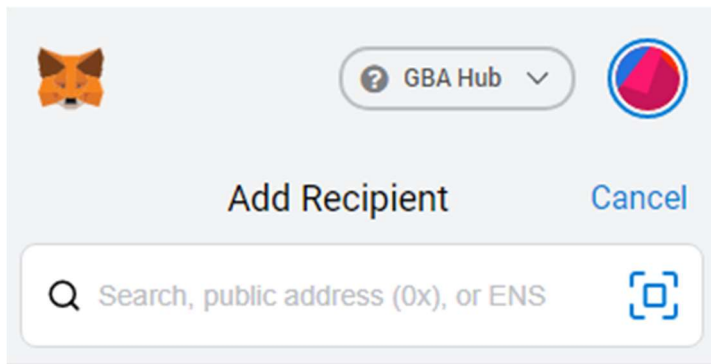

Step 3

Click **Send**.

Step 4

Enter (copy, paste) the recipient's wallet address.

Step 5

Enter **Amount** and click **Advanced Options**.

Step 7

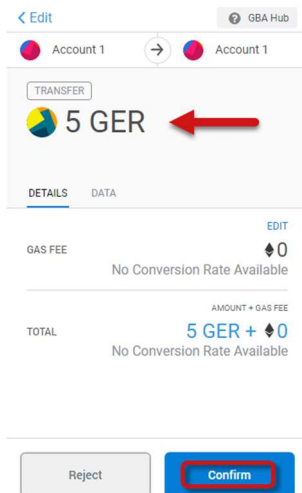

On the **Send Tokens** window, the Transaction Fee is updated to **0** to reflect your Gas Price settings.

The 'Send Tokens' window shows a transaction setup. At the top, there's a 'GBA Hub' dropdown and a profile icon. Below is a 'Send Tokens' title with a 'Cancel' link. A green checkmark and a truncated address '0x42F8...0C3D' are shown. The 'Asset' section displays the 'GER' token icon and 'Balance: 100.00 GER'. The 'Amount' section shows '5 GER' with a 'Max' button and the text 'No Conversion Rate Available'. The 'Transaction Fee' section shows '0 ETH' with a red arrow pointing to it and a 'Reset' link. At the bottom, there are 'Cancel' and 'Next' buttons, with 'Next' highlighted by a red box.

Step 8

Review the transaction. If accurate, click **Confirm** to send the tokens.

The transaction review window shows a 'TRANSFER' from 'Account 1' to 'Account 1'. It displays '5 GER' with a red arrow pointing to it. Below are tabs for 'DETAILS' and 'DATA'. The 'DETAILS' tab shows 'GAS FEE' as '0' with an 'EDIT' link and 'No Conversion Rate Available'. The 'TOTAL' section shows '5 GER + 0' with an 'EDIT' link and 'No Conversion Rate Available'. At the bottom, there are 'Reject' and 'Confirm' buttons, with 'Confirm' highlighted by a red box.

You can view the transaction in your **Transaction History**.
